DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 12-15, drawn to a method, classified in class 134, subclass 21.

II. Claims 16-20, drawn to a method, classified in class 134, subclass 20.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the different inventions they are not disclosed as capable of use together and they have different modes of operation. Specifically the first invention relies on a suction system to deliver the cleaning fluid and the second invention relies on pressurized system to deliver the cleaning fluid.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Douglas B. Little on May 26, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1746

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
